Disturbance: Please do not disturb the wildlife or take plants, fruits, fungi or wood; it deprives wildlife of food and harms biodiversity.
Feeding squirrels: Please do not feed the squirrels; feeding this pest species attracts unnaturally high numbers into the park. Grey squirrels cause extensive damage to trees by stripping bark from the main stem and branches. Some of the damaged trees die and some succumb to fungal infection.
Feeding pigeons: This attracts large numbers of birds which increases the spread of disease and causes excessive breeding. Waste food left for pigeons also attracts other vermin.
Feeding waterfowl: Feeding attracts large numbers of birds into one area, which can affect habitat quality where banks are eroded and marginal vegetation is overgrazed; excess nutrients from rotting food and waterfowl droppings degrade water quality and result in algal blooms.
Dumping plants or animals: Never release any plants or animals into the park; introductions from garden ponds and aquaria threaten the park's natural flora and fauna.
Dog waste: Pick up and dispose of dog waste in the bins provided. Dog faeces can pose a health risk to humans and wildlife, and nutrients released from it damage grassland habitat.
Dogs: Always keep dogs under
designated areas. Dogs can kill, i
waterfowl or other wildlife, and d
